COMPUTER ENGINEERING TECHNOLOGY

Markham, ON · 289-552-3894 · bwj9515@gmail.com · linkedin.com/in/bwj95 · bwj95.github.io

SUMMARY

Computer Engineering Technology graduate who builds across the full stack of hardware and software — modern web apps, embedded firmware, and the infrastructure underneath. Comfortable in C/C++, C#, Python, and JavaScript; ships responsive React and Astro sites, writes ESP32 firmware in C, and administers Windows and Linux servers. Brings a builder's mindset, a strong security foundation, and 10+ years of customer-facing experience to engineering, embedded, or infrastructure work.

TECHNICAL SKILLS

Programming	C, C++, C#, Python, JavaScript, SQL, HTML5, CSS3
Web	React, Astro, Vite, responsive/SPA design, WCAG accessibility, REST APIs, SEO/Open Graph
Embedded / IoT	ESP32 (ESP-IDF & Arduino), C firmware, BLE (GATT/NUS), Wi-Fi (SoftAP/beacon), SPIFFS, circuit design
Infrastructure	Windows & Linux server admin, virtualization, networking (Cisco Packet Tracer), IT security
AI & Automation	AI-assisted & agentic development, Model Context Protocol (MCP) integration, prompt engineering, multi-model AI workflow tooling
Cloud & Tools	Cloudflare (Workers, Pages), Netlify, Git/GitHub, PlatformIO, VS Code, 3D printing (OpenSCAD)

SELECTED PROJECTS

More at bwj95.github.io

Spark+Play Foundation — Website (*freelance client*)

React 19 · Vite · Cloudflare Workers

- Designed, built, and deployed a responsive site for a registered Canadian charity, iterating directly with the client through multiple rounds of feedback.
- Cut page weight ~84% (2.2 MB → 353 kB) by re-encoding team photos to sized WebP from master originals, and outlined brand logos to SVG vector to remove font dependencies.
- Added SEO and social link previews (Open Graph/Twitter cards, NGO JSON-LD, sitemap), and stood up a serverless contact form on a Cloudflare Worker with Turnstile anti-spam.

Polyglot — Professional Phrase Guide

React 19 · Vite · Web Speech API · GitHub Pages — bwj95.github.io/polyglot

- Built a data-driven reference app with 350+ phrases across four language directions, featuring instant search, category filters, favorites, and flashcard/quiz practice.
- Integrated the Web Speech API for native-accent audio playback with phonetic fallbacks; favorites persist in localStorage for custom cheatsheets.
- Deployed live via a GitHub Actions pipeline — push to redeploy.

ESP32-S3 Firmware & Enclosure

Embedded C++ · Python (Tkinter) · OpenSCAD

- Wrote lab firmware exposing a serial + BLE (Nordic UART) control protocol for RGB, Wi-Fi, and system commands, sharing one parser across both transports.
- Built cross-platform host GUIs in Python to drive the board over USB serial or Bluetooth.

- Designed and 3D-printed a custom snap-fit enclosure in OpenSCAD (prototype V1 accepted), covering board layout, USB-C access, and antenna pass-through.

EXPERIENCE

Freelance Web Developer

Self-employed — Markham, ON · June 2026 – Present

- Build and deploy responsive websites for clients end to end: design, development, asset optimization, accessibility, and cloud hosting (Cloudflare, Netlify, GitHub Pages).
- Manage client feedback cycles, domain/DNS configuration, and go-live launches.

Baker

Tim Hortons — Markham, ON · Apr 2022 – Sep 2022

- Coordinated with front-of-house staff to keep products fresh and stocked while operating ovens and stovetops safely and efficiently.

Call Centre Analyst

PR Exchange — Richmond Hill, ON · May 2015 – Mar 2017

- Supported customers on an energy-monitoring and smart-thermostat program, relaying technical product information and capturing sales data.
- Maintained accurate call-centre database records, logging requests and follow-ups in customer notes.

Earlier Roles

2008 – 2021

- Outdoor Property Maintenance (GQ Gardening) · Turf Specialist (York Downs G&CC) · Cabinetry Processor (Cameo Kitchens) · Grocery Clerk (No Frills) — progressive customer-service and hands-on operations roles demonstrating reliability and teamwork.

EDUCATION

Advanced Diploma, Computer Engineering Technology

Seneca Polytechnic — North York, ON · Jan 2022 – Apr 2025

- Coursework across IT infrastructure, network management, system administration, IT security, and cloud platforms.
- Deployed and managed Windows and Linux virtual servers; ran network simulations from small-office to enterprise scale in Cisco Packet Tracer.
- Built software across web, desktop, and embedded targets, alongside circuit design and hardware–software interfacing with lab test equipment.

Ontario Secondary School Diploma

Unionville High School — Markham, ON · Jul 2013
